PROFESSIONAL SUMMARY

Generative AI Developer with 2 years of experience specializing in Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and AI-powered enterprise solutions. Experienced in building conversational AI systems, immersive learning platforms, fraud detection solutions, Trust & Safety content moderation systems, and scalable AI architectures.

TECHNICAL SKILLS

Generative AI: Azure OpenAI GPT-4, Langchain, LangGraph, RAG, Conversational AI, LLMs, Gemini models, Prompt Engineering

AI/ML: Transformers, Pandas

Programming Languages: Python, SQL, C

Frameworks: FastAPI, Streamlit

Cloud Platforms: GCP

Developer Tools: VS Code, Google Colab, PyCharm

Databases: Vector Stores

EXPERIENCE

Wipro Technologies

May 2024 – Present

Generative AI Developer

Hyderabad, India

- Specialized Gen AI developer delivering enterprise AI solutions for Google Inc.
- Developed and deployed responsible and accessible landing page solutions.
- Built production-ready RAG systems, LLM-powered applications, and vector database solutions.
- Designed scalable AI architectures using Azure OpenAI, Gemini models, LangChain, Pinecone, and FAISS.

PROJECTS

Landing Page Signal Analysis Tool – Google Inc. | Python, Gemini 2.5 Pro, Streamlit, Playwright, Docker Jan 2026 – Present

- Developed an intelligent 3-signal fraud detection system that analyzes suspicious landing pages using AI and automated web scraping.
- Built entity impersonation detection, suspicious contact validation, and website quality assessment.
- Automated large-scale webpage data collection and feature extraction using Playwright, and asynchronous Python workflows.
- Reduced manual review time by 80% while achieving 95% accuracy in identifying fraudulent websites.

AI Virtual Customer Training Platform – Google Inc. | Python, Azure OpenAI GPT-4, LangChain, FAISS Oct 2025 – Feb 2026

- Developed an AI-powered immersive training platform with virtual customer simulations.
- Built policy-driven scenario generation and automated evaluation system.
- Reduced training manpower by 70%

Trust & Safety AI Content Moderation System – Google Inc. | Python, Gemini 2.5 Pro, OCR, OpenCV Jan 2025 – Sep 2025

- Developed an end-to-end AI-powered content moderation system for Trust & Safety operations.
- Built a multimodal moderation pipeline using OCR, computer vision and Gemini 2.5 Pro.
- Automated classification of potentially harmful content using OCR, computer vision, and LLMs.
- Implemented policy-based content categorization for harmful, abusive, spam, and policy-violating content.

EDUCATION

Bhoj Reddy Engineering College for Women

Bachelor of Engineering, Information Technology

Hyderabad, Telangana

Aug. 2018 – April 2022

CERTIFICATIONS

Machine Learning Specialization – Stanford University (Coursera)

Generative AI with Large Language Models – DeepLearning.AI (Coursera)

Ultimate RAG Bootcamp Using LangChain, LangGraph & LangSmith – Udemy

Deep Learning A-Z 2025: Neural Networks, AI & ChatGPT – Udemy
