PROFESSIONAL SUMMARY

IT professional with 2 years of experience in application support and data operations, specializing in support, incident management, workflow monitoring, and data validation. Experienced with Apache Airflow, Apache NiFi, and Apache Flink in supporting enterprise operations. Hands-on exposure to Generative AI, having developed a Custom RAG chatbot using Google Cloud Vertex AI, Pinecone, Gemini 1.5 Pro, and Streamlit. Strong analytical and problem-solving skills with a commitment to delivering reliable and innovative solutions.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C
Data Engineering Tools: Apache NiFi, Apache Airflow
Data Platforms: Databricks
Cloud Platforms: GCP
Developer Tools: VS Code, PyCharm
Databases: Vector Stores

EXPERIENCE

Wipro Technologies

May 2024 – Present

Data Operations Analyst / Application Support Engineer

Hyderabad, India

- Provided support for enterprise data operations and incident management.
- Monitored and managed workflows using Apache Airflow and Apache NiFi.
- Performed data validation, troubleshooting, and root cause analysis to ensure data quality.
- Developed a Custom RAG chatbot using Vertex AI, Gemini 1.5 Pro, Pinecone, and Streamlit for the Google project.

PROJECTS

FTP Operations – Telkomsel | Python, SQL, Apache Airflow, Apache NiFi, Apache Flink, Oracle SQL, Databricks

- Provided support by resolving service requests and ensuring SLA compliance.
- Monitored and maintained data workflows using Apache Airflow, Apache NiFi, and Apache Flink.
- Tracked job executions, identified issues, and coordinated with teams for timely resolution.
- Performed daily and monthly data validations to ensure data accuracy and operational compliance and Developed SQL queries and Python scripts to support data processing and troubleshooting.
- Utilized Databricks for data validation and analysis to improve operational efficiency.

Custom RAG Chatbot – Gen AI | Python, Azure OpenAI GPT-4, LangChain, FAISS

- Developed a Retrieval-Augmented Generation (RAG) chatbot using Google Cloud Vertex AI.
- Implemented document parsing, chunking, and embedding generation using Vertex AI Workbench.
- Stored embeddings in Pinecone for semantic search and retrieval.
- Leveraged Gemini 1.5 Pro for context-aware response generation.
- Built an interactive chatbot interface using Streamlit.

EDUCATION

Vaageswari College of Engineering

Bachelor of Technology

Karimnagar, Telangana

Aug. 2018 – July 2022

CERTIFICATIONS

Oracle SQL – Internal

Databricks Apache Spark – External

Python For Beginners – Udemy

Gen AI For Beginners – Udemy
